## By-Law No. 235,

OF 1896.

For Compelling the Destruction of Noxious Weeds and Plants within the Municipality of South Qu'Appelle.

BE IT ENACTED, and it is hereby enacted a by-law, of the Municipality of South Qu'Appelle as follows:

1. Where used in this by-law the term "Noxious Weed" shall mean French or stink weed, tumble weed or hare's ear mustard, Canada thistle, common mustard, wild oats, Russian thistle, and any other weed or plant detrimental to husbandry.

2. Where used in this by-law, the term "Non-resident Lands" shall apply to all lands which are unoccupied, and the owner of which is not resident within the municipality; and the term "Resident Lands" shall apply to all lands which are occupied or which are owned by persons resident within the municipality; and the term "Inspector" shall mean the inspector of noxious weeds appointed by the municipality.

3. It shall be the duty of the owner of land or the occupant thereof, if the owner is not resident within the municipality, to cut down or destroy all noxious weeds growing on his land so often in each and every year as is sufficient to prevent the ripening of their seed.

4. It shall be the duty of the inspector to give or cause to be given notice in writing to the owner or occupant of any land within the municipality wherein any noxious weeds are growing and in danger of going to seed (and in the case of property of a railway company the notice shall be given to the station master of the company's resident in the municipality) requiring him to cause the same to be cut down or destroyed within five days from the service of the notice and such notice shall be given by such inspector when and so often as may be necessary to prevent the ripening of the seed of any such noxious weeds.

5. In case such owner or occupant of land (or if it be railway property, then the station master upon whom such notice has been served) refuses or neglects to cut down or destroy all or any of the said noxious weeds within the period aforesaid, the inspector may enter upon the lands and cause such weeds to be cut down or destroyed or he may, instead of so doing, lay information before any Justice of the Peace as to such refusal or neglect, and such owner, occupant or station master shall, upon conviction, be liable to the penalties imposed by section one of this by-law, provided that in case of noxious weeds growing upon any non-resident lands the inspector may enter upon such lands and destroy such noxious weeds or cause the same to be destroyed without giving any notice.

6. Whenever any noxious weeds shall be found growing upon land under crop the inspector shall notify the owner or occupant of such lands in writing that such lands must be cleared and freed from noxious weeds before again being sown or cropped, and if after such notice the land shall have again been sown with grain and noxious weeds be found growing thereon, the inspector shall notify the owner or occupant in writing to cut down or destroy such noxious weeds within five days from the date of the service of such notice, and in case such owner or occupant neglects or refuses to cut down or destroy all or any of the said noxious weeds within the period aforesaid, the inspector may enter upon such lands and cause such weeds to be cut down or destroyed with as little damage to the growing crops as may be, or he may, instead of or in addition to so doing, lay information before a Justice of the Peace as to such refusal or neglect and such owner or occupant shall, upon conviction, be liable to the penalties imposed by section nine of this by-law, but otherwise as hereinafter provided. The inspector shall have no power to cut down or destroy standing or growing grain for the purpose of carrying out the provisions of this by-law.

7. Whenever the inspector shall find any noxious weeds growing upon any road or lowland within the municipality, or whenever any person residing within said municipality shall notify him in writing that any noxious weeds are growing upon any such road or lowland, giving in such notice particulars as to the place where such weeds are so growing, the inspector shall, within five days after finding such weeds or service upon him of such notice, as the case may be, cause all such noxious weeds to be cut down and destroyed.

8. (1) The Inspector shall keep an accurate account of the expenses incurred by him in carrying out the provisions of the preceding sections of this by-law with respect to each parcel of land entered upon therefor, and shall deliver a statement of such expenses certified correct under his hand as such inspector, describing the land entered upon and giving such expenses in detail to the owner or occupant of resident lands requiring him to pay the amount.

(2) In case the owner or occupant of resident lands refuses or neglects to pay the amount of such expenses within thirty days after such request for payment, the said claim shall be presented by the inspector to the council of the municipality, and so much thereof as the council shall deem just and allow shall be paid out of the general fund of the municipality.

(3) The Inspector shall also present to the council similar statement of the expenses incurred by him in carrying out the provisions of this by-law in respect to non-resident lands, giving a separate statement for each parcel of land, and shall also present a similar statement of expenses incurred in destroying noxious weeds growing upon road allowances and the amount of such expenses, or so much thereof as the council shall order or allow shall be paid out of the general fund of the municipality.

(4) All sums paid or allowed by the council under the provisions of Section (1) of this by-law in the case of resident and non-resident lands shall be charged in the proper books of the municipality against the lands in respect of which the expenses were severally incurred, and such several amounts shall form a charge against such lands and shall be collected in the same manner as other taxes, rates, or assessments levied by by-law of the said municipality.

9. Any person who refuses or neglects to cut down or destroy any noxious weeds after notice given by the Inspector as hereinbefore provided for, or who knowingly suffers any

noxious weeds to grow upon lands in respect of which such notice was given and the seed to ripen so as to cause or endanger the spread thereof shall, upon summary conviction before a Justice of the Peace, be liable for each offence to a fine not exceeding \$100, together with costs of prosecution, and in default of payment thereof the person so convicted may be imprisoned in the nearest common jail for a term not exceeding thirty days, unless such fine and costs, together with costs of commitment, be sooner paid.

10. Any person who knowingly sells or offers for sale any seed grain or other seed in which there is any seed of any noxious weed, shall for every such offence be liable, upon summary conviction before a Justice of the Peace, to a fine not exceeding \$100, together with costs of prosecution, and in case of nonpayment thereof may be imprisoned in the nearest common jail for any term not exceeding thirty days unless such fine and costs, together with costs of commitment, be sooner paid.

11. The Inspector shall be entitled to the following and no other fees for carrying out the provisions of this by-law, viz., two dollars and fifty cents per diem.

12. All by-laws and amendments thereto hitherto passed relating to the destruction of noxious weeds are hereby repealed.

First, second and third reading of this by-law on Monday, Aug. 18th, A.D. 1896.

J. DOOLITTLE, Clerk. W. M. HENLEY, Reeve.

## Qu'Appelle: Progress

PUBLISHED EVERY THURSDAY

At the Printing Office, Qu'Appelle Station, Assa, N.W.T., Canada.

Subscription Price \$1 per annum in advance; \$1.50 if not so paid.

S. T. SCOTT, Editor and Proprietor.

### ADVERTISING RATES.

Business cards as per arrangement according to space.

Transient Ads., such as Legal Notices, By-Laws, Tenders, Notice of Meetings, etc., 10 cents per line first insertion, and 5 cents each subsequent insertion, solid nonpareil measure.

Reading notices in local columns 10 cents per line each insertion.

Advertisements of Wants, To Let, Found, Astray, etc., 50c for first insertion, 25c for each subsequent insertion. This class of ads. must be accompanied by cash to insure publication.

Church Notices and Society Entertainments from which a revenue is to be derived will be charged for at the rate of 10 cents per line.

Rates for Commercial, Contract and Permanent advertisements will be furnished on application.

The publisher reserves the right to refuse to insert advertisements of a questionable or objectionable character.

A liberal commission allowed to parties willing to act as agents for us. Write for terms.

S. T. SCOTT, Editor and Proprietor

THURSDAY, SEPT. 3, 1896.

In the House of Commons on Tuesday, under the head of notices of motion, Mr. Frank Oliver (Alberta) asked the government to bring down copies of the memorials and resolutions or other documents from the legislative assembly of the Northwest Territories for an increase of subsidy and all correspondence in connection with the same.

Mr. Oliver made a brief speech in introducing his motion, pointing out the needs of the Territories for more money than they at present receive. He said that owing to the sparseness of the settlement the cost of administering the government could not be otherwise but heavy. He instanced how that in 1883 the expenditure for education amounted to \$67,000. This year it is \$120,000. He pointed out that other calls which bore heavily upon the revenue were public improvements, relief of distress, and grants to hospitals. Mr. Oliver claimed that the government having created governing powers in the Northwest Territories as they at present exist, should provide funds to carry it on. On the basis of provincial subsidies Mr. Oliver pointed out that the Territories are entitled to a subsidy in the neighborhood of \$450,000. They were not asking for that amount, however, but simply an increase over the present amount, which would enable the assembly to meet actual necessities of the government.

Mr. Davin seconded all Mr. Oliver had said, and expressed himself as exceedingly glad that the member for Alberta had brought the matter up. He claimed that the Territories was entitled to a subsidy amounting to \$400,000 as long ago as 1894. Mr. Davin claimed that in the past sessions he had done all in his power to bring this matter before the late government. The motion for the papers passed without opposition.

It is reported in an Ottawa telegram that the government will place a sum in the estimates to cover the

outstanding liabilities of the exhibition held at Regina over a year ago. It is to be hoped that this report is true, and that these liabilities will be speedily liquidated. The Regina exhibition was to all intents and purposes a government affair, and the government is morally, if not legally, bound to pay the legitimate claims against the exhibition management.

The financial statement of the Winnipeg Industrial exhibition association is very gratifying. The statement shows receipts of about \$26,000 and disbursements of about \$21,000. The association will have a nice little balance to the good, after allowing for some liabilities to mature during the balance of the year, and providing for sinking fund and interest on the \$30,000 loan received from the city.—Commercial.

### C.P.R. Picnic.

About 12 o'clock Friday a train consisting of eight coaches and a baggage car pulled in from Moose Jaw and the west filled with merry picnickers to the number of about 400; fully 800 were expected to attend, but owing to harvesting no doubt many could not be present. After dinner those who had not brought lunch marched to the grounds headed by the band of the mounted police, when the dancing platform was immediately occupied and the programme of sports commenced, which consisted of baseball, running, jumping, bicycle and pony races.

The first event was a baseball game between Moose Jaw Seniors and a scrub team from Regina, which ended disastrously for Regina, the score being, Moose Jaw, 16; Regina, 0. In justice to Regina it must be said that their best team was not present, and to fill the gaps several Qu'Appelleites were chosen. Moose Jaw can boast of having about the best ball club in the west, and with O'Hara pitcher and Downs behind the bat they seem well nigh invincible. The next was a match between Regina juniors and Moose Jaw juniors, in which some really good play was witnessed, the boys of both clubs playing as steadily as old timers; but, alas, Regina again was humbled, the score standing, Regina, 10; Moose Jaw 21 and an innings to spare.

The next event on the programme was the quarter mile race between Bramah, Davidson and a third man. Davidson set the pace, and when within 200 yards of the finish, spurred, Bramah stopping at the same time to remove a stone from his shoe. It looked for a second as if Davidson had a sure thing of it, but no! Bramah, after removing the stone, pulled out like a steam engine and reached the goal a good winner, with Davidson a close second and No. 3 not far behind.

The 100 yard and 220 yard races were also won by Bramah. Other races and sports followed, but space will not permit us giving the results, suffice it to say that all passed off pleasantly.

The man with money was there offering all sorts of odds on the Moose Jaw boys, but did not get anyone to take him up. In fact, he should have been "taken up" early, as the language he used in the presence of ladies and children was simply disgusting.

In the afternoon a number of the excursionists took advantage of the occasion to visit the Experimental farm at Indian Head, the train running down for that purpose at 2 o'clock, returning at 7 p.m. Several leading farmers and others spoken to expressed themselves delighted with the farm and the kind attention shown them by those in charge. In fact, it was a revelation to some who had never seen the farm before.

About 8.30 the crowd boarded

### Chase's K. and L. Pills Cure Dyspepsia.

For the last eight years I have been a sufferer from constipation and dyspepsia, I tried dozens of different medicines, but nothing gave me relief until I used Chase's Kidney-Liver Pills which cured me.

JAS. HEARD, Woodville, Ont.

WAGHORN'S GUIDE AT BOOKSTORES 5c

the train feeling pleased with the reception given by our citizens, and the pleasant time spent; everyone agreeing that Qu'Appelle is a boss place for a picnic.

Prof. Walker and his splendid band entertained not only the picnickers, but the citizens as well with selections of fine music, and we hope it will not be long before we hear them again.

Among the many persons present we had the pleasure of meeting several members of the press, Mr. Trant, of the Regina Standard, Mr. W. Scott of the Leader, Mr. Miller of the Moose Jaw Times, and also Mr. McMillan, representing the Woleley Echo.

### Qu'Appelle Gun Club Shoot.

The opening annual shoot of the Qu'Appelle Gun club, held on Friday last resulted as follows:

First event, 15 singles, known angles: A. E. Iredale, 9; J. H. MacCaul, J. P. Beauchamp and W. T. Carter, 6.

Second event, 15 singles, unknown angles: J. H. MacCaul, 8; A. E. Iredale, J. H. MacCaul and J. P. Beauchamp, 7.

Third event, 20 singles, known angles: J. H. MacCaul, 13; J. McNaughton, J. P. Beauchamp, 10.

Fourth event, 15 singles, unknown angles: J. H. MacCaul, 11; A. E. Iredale, 5; J. P. Beauchamp, 4.

Fifth event, 15 singles, known angles: J. P. Beauchamp, 12; J. H. MacCaul, 9; J. McNaughton, 7.

Sixth event, 15 singles, unknown angles: J. H. MacCaul, 12; J. McNaughton, 8; J. P. Beauchamp, 5.

Seventh event, 15 singles: J. H. MacCaul, J. P. Beauchamp, J. McNaughton, 10; A. E. Iredale, 5.

### Lawn Tennis Tournament.

The annual tournament of the Lawn Tennis club opened on Tuesday, and the following is the result so far:

Ladies' singles: Miss D. Sheppard beat Miss M. Talbot; Miss G. Davidson beat Miss Nora Boyce; Miss Mary Talbot beat Miss B. Scott.

Mixed doubles: Mr. B. Harvey and Miss B. Scott beat Mr. Mathews and Miss Nora Boyce; W. J. Davidson and Miss M. Talbot beat Mr. J. P. Sargent and Miss Mary Talbot.

### Brakesman Killed.

Harry Hoppood of Revelstoke, a C. P. R. brakesman temporarily stationed at Glacier, while attempting to board a freight last Thursday fell under the train and both legs near the feet were almost severed. Dr. Schaefer, a guest at Glacier, bound up the wounds and gave temporary relief so the sufferer might be removed to the hospital at Donald. There he was treated by Drs. Schaefer, Power and Brett who operated on both legs, but the unfortunate man did not survive it and died at 5 o'clock. Deceased was a brother of Conductor John Hoppood, and was much respected.

### To Subscribers.

### AT STITTSTVILLE!

The Town's Leading Merchant Laid Up

Rheumatism in various forms is one of the most common diseases there is, it arises generally from impure blood and a broken down system. In the limbs it is painful, in most of the internal organs dangerous, and in the heart usually fatal.

The experience of Mr. S. Mann, the well known general merchant of Stittsville, is interesting:

"Last winter I was badly afflicted with rheumatism. I decided to try Dr. Chase's Pills. To my surprise, I got immediate relief, and before I had used one box my affliction was gone. I was also troubled with biliousness for years, and at intervals of three or four weeks would be laid up with a severe headache and sick stomach. Since using Chase's Pills I have not had an attack of either."

"I may add that Dr. Chase's Ointment for piles and skin diseases is just as effective as Dr. Chase's Pills for blood troubles. I have a clerk who was so afflicted with hemorrhoids that he was unable to do his work. He used Dr. Chase's Ointment and in a few days was completely cured."

At all druggists and Edmondson, Bates & Co., manufacturers, Toronto, 25c.

Chase's Laxative and Turpentine for colds, bronchitis and consumptions. Sure cure, 25 cents.

## QU'APPELLE PROGRESS.

Thursday, September 3, 1896.

## THE NEWS OF THE DAY.

CONDENSED FOR BUSY PEOPLE.

Short and Interesting Paragraphs that Treat of Men and Things in a General Way.

The British Columbia salmon pack this year will represent a value of \$3,000,000.

Canada's exports increased \$500,000, and her imports \$1,500,000, during last month.

A small boat and lady's hat have been washed ashore at a point east of Bowmanville, Ont. There is no doubt that young Penke and Miss Darch are lost.

Sir Donald A. Smith has sent a check for \$100 to Secretary Mitchell, of the Manitoba Rifle association, as a contribution to the funds of that organization.

A daughter was born the other day to William Gillivray, corporation laborer, of Toronto, and wife. He is seventy, she was sixty last month. This is her twenty-first child.

Murphy's saw mills, at Murphy's siding, near Owen Sound, was fired recently by lightning, and with a large quantity of sawn lumber, logs, was destroyed. Loss \$25,000; insurance, \$7,000.

A C. P. R. freight train ran off the track at Pembroke, the other night. Two cars went over the bridge into the river. No one was hurt, but the Soo and west trains were blocked until the track was repaired.

The report of the provincial government on the condition of the Nova Scotia crops shows the following averages: Hay, 98 per cent; potatoes, 94; oats, 102; wheat, 97; barley, 98; buckwheat, 97; Indian corn, 95; turnips, 98.

Mr. B. B. Oiler has given an opinion that the city of Toronto has no right to claim extra mileage for Sunday street car service. The city will now take the opinion of Christopher Robinson. In the meantime the deadlock continues.

The Guelph civic auditor reports extra-Treasurer Harvey's shortage, as far as known, at \$1,000. The total defalcations will probably never be ascertained. The council has decided to proceed with criminal prosecution and accept no compromise.

Lillie Lindsay and Mary Ellis, aged 10 and 12, were killed by lightning recently near Deseronto. The children were caught in a storm and had an umbrella up, the electricity ran down the handles, instantly killing both. The bodies were burned black from head to foot.

Two men giving their names as Carter and Allan, of Buffalo, were arraigned in the Ottawa police court, the other morning charged with working a flim flam racket. Three merchants appeared each of whom had been done out of ten dollars by them.

R. J. Matchett, Grand Trunk Ticket agent at Lindsay, Ont., also agent for the Canadian Express company and several lines of steamers, has absconded, leaving quite a shortage in his accounts. The Grand Trunk and Express company are secured, but the steamboat lines concerned are out. Matchett is believed to have been speculating.

Investigation into the reported existence of foot and mouth disease among cattle on the ranges in the Moose Mountain district in Assiniboia, shows that there is no sign of the disease. The inspector was conducted by Mr. Mountford, government veterinary inspector, assisted by W. Gemmell, V. S., and two mounted policemen.

A flock of eighty sheep near Ridgetown, Ont., were taken mysteriously ill, and several died. It is supposed to be cholera. Post mortems discovered a pint to a pint and a half of sand in the stomachs and intestines, which had set in violent inflammation and caused their deaths. The supposition is that heavy rains had washed sand on the grass and had been eaten, and many cattle had died from the same cause.

Mr. Owen Clawson, storekeeper, corner King and Bathurst streets, Bradford, gathered some mushrooms last Sabbath, and had them cooked for his dinner and tea. In the evening he became ill and a doctor was summoned, who pronounced it a case of poisoning. After some enquiry as to the taste of the mushrooms it was ascertained that Mr. Clawson had eaten what is commonly known as toadstools, from the eating of which Mr. Clawson died.

Maurice Williams, a saddler in the employ of Huttings and Riley, of Calgary, died recently from injuries received. While throwing down hay from a loft late at night he fell to the floor below, breaking his arm and leg, the latter in two places. Two hours later his groans attracted the attention of Mr. Wilson, of the Imperial bank, passing by who procured assistance and took the suffering man to the hospital, where he expired. Mr. Williams was about forty years old and leaves a wife and five small children.

Harry Farewell, late of Ottawa, Ont., a farmer, eight miles east of Innesville, N. W. T., was having all one day recently with a neighbor, Mr. Shoules, and went home about 9 o'clock, the last seen of him alive. Neighbors noticed Farewell's house burning the following morning, and they found the body lying in the ruins nearly all consumed. A coroner's inquest was held by Dr. Hicks, and the verdict was accidental death through the house taking fire, and that Harry Farewell was suffocated with smoke.

There was a fatal trolley car accident in Toronto the other evening. The trolley car, proceeding south along Spadina avenue, ran into the trailer of the King street car going west. The motorman on the belt line car was seriously injured, and several passengers were pitched off the car into the road. One, an elderly lady, was picked up dead. Death was caused by heart failure induced by the shock, as there was no injury to the body. The deceased is believed to be Mrs. Sheppard, a domestic at the Cyclo Inn, Humber Bay, but the identification is not absolute. Conductor Wren, of the same car, is badly cut and bruised, the others are not hurt.

## CHICAGO'S BIG TOWER.

The American Flag Will Fly From It Higher than Any on Earth.

From an eyrie altitude of 1,150 feet Chicago proposes to look down on the rest of the world.

A tower which surpasses in height the Eiffel structure of Paris is projected by the citizens of the Windy City, and already land on which to build has been secured and actual work begun.

This cloud disturbing structure is the outcome of a patriotic desire of Chicagoans to fly the American flag higher than any other banner in the world. The structure is to be known as the City Tower, and as an attraction it will out-rival anything ever before undertaken, except the World's Fair. The base of the tower is to be 320 feet square, and it will occupy an entire city block.

At the base, from the four corner supports, each of which is 50 feet square, will rise archer 200 feet across and the same in height. These arches will support the first landing, which will have 50,000 square feet of flooring, where 22,000 persons can be accommodated at one time. There is a distance of 225 feet from the ground to this first landing.

After passing the first landing there is no other landing until one is another 225 feet up in the air. There at a height of 450 feet, there is to be a platform 150 feet square. This second platform is about as high as the top of the Great Pyramid of Egypt, or the Washington monument. Six hundred and seventy five above the ground is the third landing, far higher than any building in Chicago. At an elevation of 1,000 feet above the earth is the fourth landing, and from there stairs lead up to the very top of the tower.

Thirty-four elevators are to be used in this tower. They will be operated by electricity, the power being derived from the same plant used in lighting the structure. There will be enough steel used in the construction of the tower to build and equip a small railway. The plan of construction is very similar to that employed in the Eiffel Tower. The steel framework narrows as it rises in the air, until at the height of 1,000 feet, the fourth landing is but twenty-five feet in diameter, or one-tenth the size of the lowest landing.

There are to be many unique features in connection with this scheme, but they are not to be all amusement features. Besides fireworks, balloons, parachute performances, there is to be a restaurant in each landing. A theatre in which there will be continuous performances, and a bicycle rink are also to be provided, while at the very topmost landing there will be very powerful telescopes for sightseeing.

The plan of having a United States meteorological station at the very top of the tower when it is completed has already been discussed at Washington and favorably considered by the officials, and it is very probable that not only will Chicago boast the highest structure of man's making, upon which to float the Stars and Stripes, higher than the tri-color of France or the Red cross of St. George, but the city will have the most remarkable scientific observatory station on earth—an astronomical observatory above the clouds, yet in the midst of the city; a sky laboratory of the Chicago University and a cloud surrounded signal tower for the government weather man.

The most important observations of all on such a tower would be those relating to atmospheric electricity. What changes take place at this height which are not duplicated at the earth's surface? A few observations at the Washington monument have already shown some remarkable comparisons. There is hardly a point regarding diurnal change, abnormal change or seasonal change of meteorological element that would not be successfully aided by records from such a tower.

At the Eiffel Tower some very remarkable results have been obtained as to wind velocity. It is generally known that at the earth's surface the wind dies down till it reaches a minimum at about sunset. The time of maximum at the earth's surface is usually about 3 p. m. At the Eiffel these conditions are almost exactly reversed in the colder months, then the maximum occurs near sunrise and the minimum in the afternoon. This would be a very interesting phenomenon for study at Chicago.

The Eiffel tower cost \$1,200,000, while the estimated cost of the Chicago tower will be but \$800,000. The structure and all connected with it will be more of an invention than an architectural problem. Special attention will be given to showing on it the best result of electric skill, and among the novelties will be a new feature in handling and operating the different flags, the thirteen largest of which will all at once unfurl to the breeze in a moment's time. At sundown by again pressing the button they will disappear for the night. The elevator service will develop many new features before being used. While all may ascend the tower by means of elevators of the most approved kind, yet the descent may be made with perfect safety in a more rapid, convenient and novel way.

In appropriate and convenient places in the tower are to be photographic studios, bath rooms, barber shops, conservatories and telegraph and telephone stations. The interior space on any of the landing platforms, can, when so desired, be used by parties for dances, meetings or other similar purposes.

To guard against the possibility of accident from gales the tower will be peculiarly braced and bolted. Engineers claim that when properly constructed there is less danger in such a structure from the wind or earthquake than in many a less lofty building.

At the corner of each landing there is to be built a small circular booth, small as compared with the rest of the building, but in reality a very sizable structure. There will be accommodation in the tower for forty thousand people at one time, and in that respect it will be the largest building in the world. A lease of the tower for ten years has already been signed by a syndicate of Chicago and New York men, and the constructors claim that the tower will be completed and ready for business next summer.

The three year old daughter of Elias Pratt, of Cornwall, was recently burnt to death in her father's house. The child was left alone asleep and it is supposed a spark from Pratt's pipe fired some shavings as he left the house. Desperate efforts were made to rescue the child without avail.

## WHEN OTHERS FAIL.

DR. WILLIAMS' PINK PILLS RESTORE HEALTH AND STRENGTH.

A Well Known Young Lady in Napanee Gives her Experience—So Weak that She Could not go Upstairs Without Resting—Her Friends Thought She Was in Consumption—Now the Picture of Health and Strength.

From the Beaver, Napanee, Ont.

Among the young ladies of Napanee there is none better known or more highly esteemed than Miss Mary L. Byrnes. Indeed her acquaintance and popularity covered a more extended field, as she is a travelling saleslady for the Robinson Corset Co., and has many customers on her route which extends from Oshawa to Ottawa. How this young lady happens to be the subject of this article is due to the fact that she has recently undergone a remarkable change through the use of those wonderful little messengers of health, Dr. Williams' Pink Pills. When the reporter of the Beaver called to make enquiry into her cure, he was met at the door by the young lady herself, whose rosy cheeks and healthy appearance gave no indication that she had undergone a prolonged illness. The reporter mentioned his mission and found Miss Byrnes quite willing to tell the particulars of what she termed "an escape from death." In reply to the query "what have Dr. Williams' Pink Pills

done for you?" she replied, "why, they have done wonders. I feel like a new woman now. For eight years I was weak and miserable, and at times I could not walk. I was greatly troubled with indigestion, and frequently could not keep anything on my stomach, not even a glass of milk. I had dizzy spells, severe headaches, and my complexion was of a yellowish hue. My kidneys also troubled me, and in fact I was all aches and pains. In going up a flight of stairs I had either to be assisted up, or would have to rest several times before I got to the top. At times my hands and feet would have no more warmth in them than lumps of ice. On one occasion while in an hotel in Kingston, after waiting on a number of my customers, I fell down in a faint. The landlady found me in this condition, and sent for a doctor who, after bringing me back to consciousness, gave me medicine to take. He told me that my system was so badly run down that it was imperative that I should have absolute rest. His medicine had no beneficial effect that I could see, and I tried a number of other doctors, with no better results. I became so low that I cared for neither work nor pleasure, and my friends thought that I had gone into consumption. It was at this juncture that I determined to give Dr. Williams' Pink Pills a trial, and my appearance now will show you what a wonderful change they have wrought in me. I continued taking the Pink Pills for three months, and before discontinuing them, every ache and pain had disappeared. I cannot speak too highly of this wonderful medicine, and am eager to let the fact be known for the benefit of other sufferers."

Mrs. Byrnes was present during the interview and strongly endorsed what her daughter said, adding that she believed that they had saved her life. The experience of years has proved that there is absolutely no disease due to a vitiated condition of the blood or shattered nerves, that Dr. Williams' Pink Pills will not promptly cure, and those who are suffering from such troubles would avoid much misery and save money by promptly resorting to this treatment. Got the genuine Pink Pills every time, and do not be persuaded to take an imitation or some other remedy from a dealer, which, for the sake of extra profit to himself, he may say, is "just as good." Dr. Williams' Pink Pills make rich, red blood, and cure when other medicines fail.

## TWO MEN KILLED.

Fatal Accident on the C. P. R. East of Port Arthur.

The Port Arthur Journal gives particulars of a double fatal accident on the C. P. R., some distance east of Port Arthur, and in which Mr. David Carson, of Wolf River, a brother of Mr. S. Carson, agent at Schreiber, and Mr. Patrick J. Klev, of the building and bridges department, were killed. The two men, accompanied by another, were coming from Nepton to Wolf River, a distance of about twenty miles, on a hand car, after having been spending the day at the C. P. R. picnic there, and as they were about four and a half miles east of Wolf River they were overtaken by a freight train. When the train was quite close to them the one who escaped jumped and called to the two unfortunate ones to jump also, but it is supposed they made an attempt to get the hand car off the track and in doing so lost their lives. One was found on either side of the track, having been killed instantly. Dr. Smellie, district coroner, was telegraphed for to hold an inquest if it was found necessary, and he left for the place next morning. The accident occurred at 2:30 a. m.

## Won by a Bostonian.

Some time ago the Montreal Bridge Co. invited designs for a bridge to be built from Monreal across to the south shore, offering a prize of \$10,000 and a second of \$500. Mr. Walter Chanley, the well-known engineer, was appointed to decide as to the merits of the several plans, and no less than 24 were sent in to the office of the company of which Mr. Henry Hogan is the president. Seven designs came from Europe, one from India, sixteen from United States; yet strange to say, none came from our own Dominion. The award has now been made, and the first prize goes to E. S. S. Law, C.E. of Boston, while A. L. Bowman of Monoke, Va., gets the second.

## ADAM'S GINGER BEER.

For Making a Delicious Health Drink at Small Cost.

Receipt—Adam's Root Beer Extract . . . one bottle Fleischmann's Yeast one half to one cake Sugar . . . . . two pounds Cream of Tartar . . . . . one half ounce Lukewarm water . . . . . two gallons

Dissolve the sugar, cream of tartar and yeast in the water, add the extract, and bottle; place in a warm place for twenty-four hours until it ferments, then place on ice, when it will open sparkling, cool and delicious.

The ginger beer can be obtained in all drug and grocery stores in 10 cent bottles to make two gallons.

## A Billy Goat's Banquet.

John Schaeffer, employed by the Keystone Axle Company, of Pittsburgh, Pa., recently drew \$17 as his week's pay. The money was in bills. Putting it in the pocket of his coat he started for home. On the way he stopped to pitch quoits and hung his coat upon a fence. During the game Charley Riley's billy goat browsed along on the other side of the fence. Seeing the coat, he nibbled at it and ate out the pocket containing the money. Alderman S. F. Kerr refused to receive an information charging the goat with larceny, but advised Mrs. Riley to sell the animal to Schaeffer. The latter could then sell the goat and recover the money. Master Charles Riley cried and refused to part with his pet. Then Mrs. Riley refused to "cough up" the money. As Schaeffer was determined, Mrs. Riley sent the goat to a slaughter house, where it was killed. Enough fragments of the money were recovered to show that the goat had eaten \$17 and the Treasury officials, to whom the pieces had been sent, notified Schaeffer that they would pay the full amount.

## Live up to Your Privileges.

If we read of some new fabric made in some foreign country which gave protection from cold, providing a healthful warmth in all sorts of weather, we would consider it wonderful and be envious of the people who could take advantage of it. But because Fibre Chamois is quite inexpensive and easy to get perhaps some have not yet tested its merits and found out for themselves the splendid winter comfort a layer of it will impart to all outdoor garments. Its weather qualities are genuine, founded on the fact that it is made entirely from Spruce Fibre, and is therefore a complete non-conductor of cold. This, as well as its light weight, makes it an ideal addition to every one's fall and winter clothing.

First Citizen—Do you mean to say that since you have been working at a dynamo station you have got rid of your rheumatism? Second Citizen—Just so. The disease seems to have left me and gone into my watch.

## Thankful to B. B. B.

DEAR SIRS—I am thankful to Burdock Blood Bitters that I am strong and healthy to-day. I suffered from Biliousness and bilious fever so much that I was out of my mind night after night, but I am now entirely cured by the use of two bottles of B. B. B.

NELLIE L. HENDERSON,  
Kirby, P. O., Ont.

James—What is the two-thirds rule? Samuel—At my house it means the rule of my wife and boy. And it goes.

## Why Some People Fail.

The world is full of people who have failed because of Dyspepsia, Biliousness and Constipation, which are responsible for nine-tenths of life's miseries. Burdock Blood Bitters cures these diseases as well as all other diseases of the stomach, liver, bowels and blood in 97 cases out of 100.

Don't judge other people; you can make them feel much more uncomfortable simply by criticizing them.

## Light in Asia—It Shines Clearly.

MESSES. T. MILBURN & CO., TORONTO.  
DEAR SIRS—There is a light in Asia after all, and the man that advised me to try your Heart and Nerve Pills was a friend indeed and truly a friend in need. Before I started to take them I was languid, weak, sleepless and nervous. My brain was beclouded and I could not collect my thoughts, I had gone through an operation in the hope of relief but still remained generally broken up, my appetite was gone and I was almost without hope or ambition.

Now I feel thoroughly rebuilt through the use of Milburn's Heart and Nerve Pills, and it took only three or four weeks to do the work.

I often think of the years of suffering I might have escaped had I only known of Milburn's Heart and Nerve Pills in time; but I am grateful to be restored to health at last, and gladly recommend the medicine that cured me.

ANTONE WALTERS, Artist,  
Pasadena, Cal.

Fifty years of success in curing Diarrhoea, Dysentery, Cholera, Colic, Cramps, Bowel Complaints of summer and fall, etc., stamp Dr. Fowler's Extract of Wild Strawberry as the best remedy in the market. It saves children's lives.

Mr. Oldback (aged fifty)—Will you be my wife? Miss Oldmaid (aged forty)—Yes, my love, I'd rather be an old man's darling than a young man's slave."

## A New Combination.

As their name signifies, Laxa Liver Pills are a combination of laxative principles with the best liver medicine obtainable. They cure Sick Headache, Constipation, Biliousness, Liver Complaint, Dyspepsia and all deranged conditions of the Stomach, Liver and Bowels.

Miss Antique (school teacher)—What does white spell? Class (No Answer). Miss Antique—What is the color of my skin? Class (in chorus)—Yellow.

## Colic Cured.

DEAR SIRS—I was very bad last summer with colic and a few doses of Wild Strawberry cured me. I am safe in recommending it as the best remedy ever used. I cannot speak too highly of it.

MRS. MILDRED VICE,  
Berlin, Ont.

## PILL-ANTHROPY

or Philanthropy to Give you Good Health for 10 Cents—The Cost of Dr. Agnew's Liver Pills—Safe, Safe, Quick, and Pleasant to Act. No Pains, no Griping.

For Sick Headache, for distress after eating, for Biliousness, for coated Tongue, for Constipation. They work wonderful cures. All druggists have them. 10 in a vial, 10c.

He is a great friend to the poor. So he is. He will keep any of his friends poor if they will give him half a chance.

## A RECOUNT NOT NEEDED.

Wine in Every Contest—This is the Record of Dr. Agnew's Cure for the Heart—Mrs. W. T. Rundle, of Dundalk, Ont., Cured in One Day—Dr. Agnew's Catarrhal Powder the Only Remedy to Go Sylvester Lawrence, of Wyndham Centre, Ont., any Good—Dr. Agnew's Ointment a Certain Cure for Piles—Dr. Agnew's Liver Pills Cure Constipation and Headache.

Continued experiments are needed to test the certainty of some things, but this has no application in the case of Dr. Agnew's Cure for the Heart. No matter how severe the pain, it will immediately relieve. Relief comes within one half hour. The disease may be of years' standing, it is specific will remove it. Mrs. W. T. Rundle, wife of a well known cattle dealer in Dundalk, suffered severely for a considerable time from heart disease. As she says: "I was for some time unable to attend to my household duties. No remedies did me any good. I was induced to try Dr. Agnew's Cure for the Heart, and I must say the result was wonderful. The pain left me after the first day and I have had no trouble since."

Dr. Agnew's Catarrhal Powder is recommended by all classes of people. The leading clergymen of the country, over their own signatures have borne testimony to its effectiveness. Nearly 100 members of the late house of commons have done the same service. It has cured the worst cases of deafness, an outcome of catarrh. Sylvester Lawrence, of Wyndham Centre, Ont., says that this remedy is the only thing that he can use with ease and comfort. His words are: "It is the best remedy I have ever tried and I have used a good many." The very best thing that can be said of Dr. Agnew's Ointment is that in the case of piles it will cure in from three to six nights. It is a certain cure for tetter, salt rheum and all eruptions of the skin. Simple and most effective are the Little Liver Pills of Dr. Agnew. They are easy to take and cure Sick Headache, Constipation, Biliousness, Indigestion and all liver ills. Ten cents a vial—10 doses.

Gold Pair of Spectacles, \$3.00. Steel pair, \$1.00. Fitted by mail. PROF. CHAMBERLAIN, Eye Specialist, 87 King Street, E., Toronto.

## HIGH CLASS TEA.

Nothing of late years seems to have escaped the craze for cheapness at the sacrifice of Real Quality. Tea has been singled out as a fair game for the onslaught of advertisers who have vied with each other to deprive the taste of the public by appealing to their pocket instead of the expense of their palate. The public, misled by the rubbish that has been so persistently forced upon them, have hailed with gratitude the advent of the MAZAWATTE TEA.

MAZAWATTE, "The Standard Brand for Fine Quality," distinctly Tea of the highest character, elevating the public taste.

KENNETH MACKENZIE & CO. WINNIPEG.

## I THINK RICHARD'S PURE SOAP

IS THE BEST IN THE WORLD.

WHAT DO YOU THINK?

Return 20 wrappers taken from Richard's Pure Soap to my address and receive a handsome Souvenir; 12 wrappers for your choice of 150 books of fiction, by popular authors. Useful books free on application.

Address D. RICHARDS, Woodstock, Ont.

## ECLIPSE SOAP

This is the public verdict. Don't deprive yourself of the benefits awaiting you, but include in your next grocery order a twin bar of Eclipse.

## FAMOUS TRAIL CREEK.

A YOUNG CAMP THAT CONTAINS MANY RICH MINES.

A Brief Resume of This Most Wonderful Place—Four Thousand Claims Registered Since 1890—Development of the Camp Has Now Fairly Begun—Notes by the Way.

The Trail Creek mining camp, in British Columbia, is on the mountains of the Columbia Range, part of the larger Gold Range, and is on a line between Revelstoke and Spokane, about 150 miles by train from the latter. The district is naturally divided into three distinct belts, the Centre the North and the South. Five low hills comprise the Centre belt, where all the mines have the same characteristics, the veins being marked by iron cappings, and the ore running high in gold with some silver and copper. The North belt, which has yielded as high as \$1,200 a ton, at the 250 foot level. The South belt yields gold and copper, with gold values a little lower, and some galena. The South belt has arsenical iron and copper, running higher in silver, with the exception of one mine, which yields highest in iron.

The town of Roseland lies in an amphitheatre, Red Mountain, Monte Cristo, Deer Park, Spokane and Columbia, with tapering summits, surround this growing centre. Geologically, says one mining engineer, the rocks are not classed with any particular epoch. They resemble somewhat the formation at Sudbury, Ontario. A mining expert of long and wide experience, says he personally knows of no mining country like South-west Kootenay, except locally in Norway, where the ore is reported to be of much the same nature as in Trail Creek. Greenstone is the prevailing rock. In the vicinity of veins the rocks are broken, with numerous lands of pointage, and have a blocky, abrupt appearance. As far as known the mineral veins seem to run in an easterly and westerly direction. They vary in width from a few feet to sixty feet, and some are described as running as high as 200 feet in some places. The ore in all cases is covered with iron capping, the line of cleavage being marked with a red mass of oxidized iron. Though there are records of rich assays per ton a few feet from the surface, these are exceptions, and the general statement may be made that the ore has been found from 30 to 100 feet beneath the capping. It may also be stated that up to the present time the veins seem to be of the same nature.

This little colony of aliens is still in existence, chiefly inhabited by descendants of the original Iroquois, but a few of Sir George's men are said to be still living.

## TROUBLE UP NORTH.

Report of the Murder of an Indian at Lac St. Anne.

Advice received from Edmonton state that Inspector Snyder recently left for Lac Ste Anne, for the purpose of enquiring into the circumstances surrounding the disappearance of a young Stoney Indian, named Pierre, who is reported to have been killed in a brawl by an old Iroquois Indian. It seems that about ten days ago the Iroquois and a brother of Pierre had a fight in which the Stoney came out second best and Pierre took up cudgels on his brother's behalf, and was beaten off and killed by the stout old Iroquois, imbrued no doubt with the fighting spirit of his warrior ancestors. It may be a matter of surprise to some to find an Iroquois among the Indians of the Edmonton agency, but away back in the early forties when Sir George Simpson, the famous Hudson Bay governor, was visiting the principal post of the company in the north he performed the journey from Montreal by means of canoes which were almost entirely manned by Iroquois Indians, who were always considered excellent river men. The greater number of these Indians knowing that the free life to which they were wedded was fast becoming impossible to them in the east owing to the rapid advance of civilization, found here in the Northwest a country after their own hearts, teeming with game and fur and thousands of miles from civilization. They took wives to themselves from the Cree and founded an Iroquois settlement away upon the Athabasca river where the Yellow Head pass enters the Rockies. This little colony of aliens is still in existence, chiefly inhabited by descendants of the original Iroquois, but a few of Sir George's men are said to be still living.

## A \$750,000 FIRE.

Buffalo Loses Her Magnificent Exhibition Building.

Three-quarters of a million dollars' damage was done by fire, which broke out in the lower part of the exposition building at the Buffalo driving park at 7 o'clock the other evening. The exposition building, which is an immense frame structure was a mass of flame before the firemen got to work, and a strong wind which was blowing soon spread the flames. To the north of the main building at the end of the art gallery, the club house, police headquarters and then a long row of stables, in which were housed many valuable trotters which had taken part in the grand circuit meet during the week. All of these buildings were soon ablaze. The work of rescuing the horses was carried on hurriedly, all of them being taken out in safety. The great majority of the owners, however, lost snaffles, harness and other fixtures. While the firemen were busy in attempting to save the grand stand which was immediately in front of the burning stables, the flames reached over onto Fuller street and obtained a good hold on a row of frame dwellings. Seven of these were destroyed, as also were four similar buildings on Dupont street. In the exposition building was stored all the election booths and hydrant covers belonging to the city. These were destroyed. The heat was terrific, and some fifteen firemen were overcome, and had to be taken to the hospital. None of them, however, were seriously injured. The fire was undoubtedly incendiary. It started at the topmost part of the tower on the main building. The loss is estimated at \$750,000, the greater part of which will fall on the company owning the driving park and exposition building. It is understood to be fully covered by insurance.

## COTTON SEED OIL.

The Chinese Will Soon be in a Position to Affect the Markets of the World.

U. S. Consul-General Jernigan reports to Washington that the prospects of a new industry is now before the people at his station, Shanghai. It is called the Shanghai Oil Mill Co., which purports to manufacture oil from cotton seed. It is the logical result of the cotton mills at Shanghai and the consequent stimulus given to the cultivation of cotton in China.

Since 1890 there have been forty-five new manufacturing plants established in Shanghai. They are all in successful operation, and especially the cotton factories, in which large capital is invested. The area suitable for cultivation of cotton in China is almost as limitless as the supply of labor, and the labor being very cheap there can be no doubt that China will soon be one of the great cotton producing countries of the world, and that this product, produced and manufactured in China, will command serious consideration in all calculations with reference to the cotton market. It will not be safe to discount the cotton of China, because it now grades low, for it is certain to improve. At present it is estimated there are 30,000,000 tons of cotton seed, equal to 90,000,000 gallons of oil now yearly lost to commerce, which would find a ready market.

## ONTARIO GOLD.

The "Empress" Mine, Jack Fish Bay, Produces a Gold Brick.

The north shore of Lake Superior has been added to the gold producing districts of the world. There was recently received from the Empress mine, Jack Fish Bay, Lake Superior, the first gold brick from the new mill recently erected at the mine. The result is very gratifying to the directors, and they are already talking of increasing the mill's capacity from ten to twenty stamps, as there is now plenty of ore in sight to keep twenty going. The Empress was organized last December under the Ontario mining laws with \$100,000 capital. The owners of the mine took \$20,000 paid up stock for the property; \$40,000 of the remainder was issued at 50 cents, putting \$20,000 in cash in the treasury and before this amount is spent in mining, building and mill the mine is producing more gold bullion than will pay working expenses of the mine and mill. Neither British Columbia, South Africa, Australia or any other gold producing country in the world can equal this record for All-goma, Ontario, Canada.

## DESPERATE FIGHT WITH BURGLARS.

Two of Them Will Likely Die as a Result of the Battle.

There occurred recently at the little village of Bedford, on the New York and Harlem railroad, a battle with burglars that reads more like a tale of the Wild West in its palmy days than that of an actual occurrence in a thickly populated portion of the Empire State. The general store of W. B. Adams & Son, in Bedford village is a large one. The firm is old established and known to every one throughout West Chester and surrounding counties. The place has been frequently visited by burglars, who, after plundering the store, have invariably made their escape. To safeguard his property Mr. Adams recently put in a burglar alarm. Wires were attached to all the windows and doors, and an alarm bell placed in the family residence, which is just across the road from the store. It was the ringing of this alarm bell at an hour in the morning that told Mr. Adams and his son that something was wrong. Hastily dressing the two men made for the store. The elder was armed with a shot gun, while the son carried a Winchester rifle. The father went to the rear of the store, and the son to the front. As the son approached the building he ran into a young man. Grabbing him, young Adams ordered him to stand under a gas lamp and pointing his rifle at him told him that if he moved he would shoot. A moment later a perfect fusillade of shots were heard by the son and he could hear loud shouts and groans. He left his prisoner in front of the store, and started around the end of the building to his father's aid. As he reached the side street a big burly fellow holding a smoking revolver in his hand, approached him and shouted, "Keep still or I will shoot." But young Adams was not keeping still just then. Like a flash his Winchester was at his shoulder and in an instant the robber was lying on the ground, a bullet through his lungs. Pressing on, young Adams saw another man running down the road. Again his Winchester came to his shoulder and as it cracked the flying man gave a cry and fell on his face. The son then rushed to the back portion of the building, but only to find his father on the ground, a bullet hole through his head and his empty shot gun by his side. Only one shot had struck the old man, but it was enough. Before he could receive medical aid he was dead. By this time the neighborhood had been aroused and the excitement was intense. In the excitement the young man whom Adams junior had caught, escaped. Both of the robbers who had been wounded were carried to the county lock-up and doctors say they cannot recover. It is known that there were four men engaged in the burglary. A man was taken to the Brooklyn hospital the following afternoon, suffering from a gun shot wound, which he says was self-inflicted, but it is believed he is one of the burglars whom the elder Adams shot before being killed. Young Adams has always been looked upon as a "dude," and not the kind of a young man who would put up a stiff fight with four desperate men. Now he is the envy of all his youthful neighbors and the centre of a group of hero worshippers.

## A TOWN WIPED OUT.

The Inhabitants of a Michigan Town, Numbering 2,000, are Now Homeless.

Telegraphic communication has been restored with the town of Ontonagon, Mich., which recent dispatches reported as having been wiped out of existence by fire. Reports state that the fire has left absolutely nothing of the town, and the scene is one of abject horror. Two thousand people who were comfortably housed a few days ago, are now homeless and without shelter or without food. The catastrophe began with the small fire in the swamp just south of the town to which no attention was paid, as they were not considered dangerous. But the other day the wind freshened to a gale from the south, the swamp fires were driven into the seasoned lumber piles in close proximity, and before effective defense could be made, the flames were beyond control and driving straight for the village at a rate so rapid that nothing was thought of save the salvation of human lives. In response to appeals, the railroad sent all available engines on cars. The Chicago, Milwaukee and St. Paul transported the homeless people to Rockland in box cars, whether they were given shelter. The loss will aggregate several million dollars, and it is doubtful if the mills destroyed will ever be rebuilt, as nearly all the pine in this country has been cut. The ruin involves the extensive lumber and box manufacturing plant of the Diamond Match company, an establishment alone worth upwards of \$1,000,000 and reported to carry about \$500,000 insurance on lumber and plant. Sargent, Ginn & Gilkey, of Oconto, lumber, loss, \$100,000; Louis Reidinger, of Marquette, lumber dock, loss, \$25,000; John S. Hawley's big store, total loss, \$20,000. Chicago, Milwaukee and St. Paul depot, postoffice, court house, jail and school, loss, \$50,000; Jas. Mercier's large warehouse, dock and coal sheds, \$50,000; water works plant, and government breakwaters seriously damaged. The property loss in Ontonagon itself, independent of the destruction of the Diamond Match company plant, is \$50,000.

## Guarded With Rifles.

A wonderful gold strike has been made at Cedar Hollow, in the vicinity of Gaylord, on the western slope of the Tobacco Root range, in Madison county, Montana, and hundreds of prospectors are rushing to the new district. The strike is the richest ever made in the state. The surface ore, of which several carloads have been shipped, has yielded from \$300 to \$500 per ton, and the returns from 12 carloads closely approach \$100,000. Another carload of select rock, which is about ready for shipment, is expected to net not less than \$25,000. This has all been taken from the surface cut, and as the locators have only been at work since July 1, it remains yet to be seen whether it comes from a true vein or only a deposit in the line of formation. The mine is guarded by men armed with rifles.

## An Army Corps Arrested.

The entire Atlantic City branch of the Salvation Army, including Fossan 14th Dorn, several uniformed members of the corps and a varied assortment of musical instruments, was recently taken into custody, and arraigned before Recorder Ingersoll, in the local police station. The

arrest grew out of the war which hotel-keeper Edward Moss had declared upon the Salvationists.

The noise of their meetings held in the open air at Arkansas and Atlantic avenues, annoyed the guests of his hotel on the opposite corner, and to drive them out of the business he organized a call-thumped band of doubtful ability. The two rival organizations managed between them to make life miserable for all the residents of the neighborhood, and numerous complaints were made to the police. The other night the rival noise-makers gathered again, and before they could begin the evening's duel the police swooped down upon the Salvation army corps and placed it under arrest.

The patrol wagon was summoned and all the Salvationists who could be accommodated in it were packed away. When arraigned before the Recorder the Salvationists were given a severe lecture for blocking the streets, and warned that if they risked the provisions of a city ordinance prohibiting this again they would be fined and imprisoned.

## SOME REMARKABLE EFFECTS.

Poisons That Produce Permanent Imbecility, and Others Turn the Skin Blue.

"There are some hundred and fifty different poisons known to us," said a celebrated toxicologist in the course of a quiet chat with the writer for "Pearson's Weekly." Perhaps not more than a third of them are known to exist, and every year we add two or three newly discovered poisons to the existing list.

The effects of some poisons are very remarkable indeed. Poisons do not necessarily kill. All noxious drugs are classed as poisons, and contrary to the general supposition that all poisons have fatal properties, some merely cause the destruction or reduction of certain facilities common to the human being. For instance, there is a poison which has been known to the natives of India for probably hundreds of years, but which is very little known to us; it is called diabolura. If given in proper quantities it destroys the power of the mind, and causes permanent imbecility. It is a powerful drug and owing to its not being altogether unpleasant of taste, was extensively used in India for private revenge in the days when that vast continent looked after itself. Many a potent person has been made incapable of fulfilling his office by this drug, administered at the instigation of some rival who desired to take his position. Ah! there's many a blood curdling romance and many a terrible tale of tragedy would round the history of Indian poisons.

Nitro-benzene is another poison which contains remarkable properties. It is not known that the poison I have just mentioned, but few people are aware of the extraordinary effect it causes. Mind you, this is a poison in the sense in which the term is generally accepted—it is a deadly poison. A person having taken a sufficient large dose of nitro-benzene experiences no immediate discomfort, but his skin gradually assumes a hideous bluish, or rather, purple white color, which is simply horrible to see. As I say, he feels no discomfort; he may continue to do whatever he was occupied in doing before he took the drug without the least difficulty. But suddenly as if he were struck by a flash of lightning, he will feel the spasm of death and cease to exist.

A very peculiar case attracted my attention a short time ago. It was that of a street hawker who was suffering from a form of paralysis of the brain, which I was convinced was caused by poisoning. My investigations proved my hypothesis to be a sound one. The man, occupied a small, ill-ventilated room in Drury lane, had, the day before his attack, purchased a stock of India rubber goods which he intended to retail on the streets. These goods, as is frequently the case, had, during the night, given off a large quantity of bi-sulphide of carbon, which brought about the man's paralysis of the brain. He subsequently recovered, however the case is probably unparalleled.

A very large percentage of known poisons affect the brain in some way or another. Experimenting with mercuric compounds has frequently caused temporary and sometimes permanent insanity. The most careful measures are necessary to insure safety when dealing with mercury.

"Some poisons cause symptoms which are not infrequently mistaken for symptoms of certain diseases. For instance, atropine, a very poisonous substance, extracted from that fairy-like hedge-wed, the deadly night shade, taken under certain circumstances, causes symptoms in many ways resembling scarlet fever, while the early symptoms of cholera are very strangely like those of arsenical poisoning."

## The First on Record.

The first woman's train in the world left Syracuse a few days ago for the Thousand Islands, over the Rome, Watertown and Ogdensburg railroad. The train is run by the Woman's Christian Association, of Syracuse, who formed themselves into a tourist company for the purpose of running the train and also operating the steamboats on the St. Lawrence River during this personally conducted tour. The engine was started by Mrs. James K. McGuire, wife of the Mayor of Syracuse, and each car in the train had a woman conductor, in uniform, and a woman chaperon. The Thousand Islands Steamboat Company's steamers, run in connection with this tour will also be officered by the women, the women having appointed a commodore, captain, mate, purser, steward, cook, engineer, fireman and crew to serve on each excursion steamer. The train consisted of 12 vestibule cars, including the Wagner palace cars, and carried about 100 passengers.

## The Army Worms.

Up to the middle of last week there were but few reports of damage done to growing wheat by the army worm in North Dakota. Now reports are being received with alarming regularity of damage from all parts of the state and at near by points in Minnesota. Whole fields have been ruined and many farmers have plowed around large fields and left the worms to do their worst. What wheat was left by hand seems to be in danger now of being rendered worthless by the ravages of the army worm. Within a very few miles of the city of Grand Forks the damage seems to be the most extensive and the farmers are adopting any and all remedies to rid themselves of the pest. Some excellent wheat has been ruined entirely within the past few days.

## IN THE HANDS OF THE MOB.

Constantinople the Scene of a Furious Riot—Ottoman Bank Raided.

On a recent afternoon, a score of men, armed with revolvers and bombs, invaded the Ottoman bank at Constantinople, killing a number of good-looking guards. Closing the doors of the Ottoman bank to prevent for the time being, the onward advance of the mob, the employees of the bank fled to the quarter occupied by the tobacco syndicate which control the collection of taxes on tobacco throughout the Turkish empire. The invaders mounted the roof of the building and from the open windows fired at the police in the streets below. The police returned the fusillade in a vigorous fashion, and several were killed and wounded. The riot became general, shops were sacked and bazaars invaded, and the wildest excitement prevailed throughout certain quarters of Constantinople. A later report says that there is no doubt that the movement was revolutionary in plan and scope, that it had its origin at the secret meetings of the Hinkchist Armenians. A bomb exploded in Constantinople, near the Galata Serail guard house. Many soldiers were killed and wounded. Her Majesty's steamship Dryad at once left Therapia, where she was anchored, and proceeded to Constantinople. Her Majesty's steamer Cockatrice has arrived en route to the Danube. She will probably remain there on account of the riots.

## This Time a Lad of Twenty.

A dispatch from New York announces the marriage of Baronesse Blanc to Vaughn Waters, a wealthy young New York boy about twenty. What adds interest to the event is the fact that the baronesse is the divorced wife of a young Hamiltonian, Shirley Onderdonk, son of Andrew Onderdonk, an extensive railroad contractor. She is 35. When she was Miss Elizabeth Lawrence Nicholson, daughter of F. L. Nicholson, a prominent citizen of Philadelphia, she attracted attention by reason of her beauty. In 1890 she married a wealthy merchant of the Quaker City, Alfred Lawrence, Reigel, who left her after a few months of matrimony, and when she procured a divorce she went upon the stage as Betty Reigel, but was a failure. In 1887 she married Baron Frederick Bine, a member of the Long Branch west end coterie. The pair spent their honeymoon in Europe. Blanc had no title, the name baron being given him at his christening and it pleased the humor of the woman to call herself "baronesse." Fred Yenseng, son of a millionaire brewer, was the corespondent. The baronesse again tried the stage, and again failed. Then she married Shirley Onderdonk and a divorce followed the next year.

## A Terrible Accident.

Peter Ryan, foreman of the St. Lawrence mine, of Butte, Mont., the property of the Anaconda mine, and Jack Campbell and John Manning, two miners, were killed the other evening by the fall of a cage from the top of the mine to the bottom shaft, at the 1,200 foot level. The two miners were working at the bottom beneath the bulkhead at the 1,200 foot level, deepening the shaft, when the cage containing Ryan fell from the top, instantly crushing the life out of the two men below and killing Ryan.

Ryan had gone to the top and was about to step out of the cage. The brake refused to work and the cage started down the shaft at a fearful velocity. The engineer tried to throw out the clutch but could not. The safety appliance also refused to work, and the engineer and brakeman jumped out of the window in time to avoid the crash of iron and wood as the reel broke in pieces and tons of iron shot up through the roof and walls.

## The Scheme Abandoned.

Mr. Nozoe, the Japanese consul at Vancouver, B.C. has stated that he has abandoned the scheme to form a Japanese labor immigration organization for Manitoba, thinking that its success would aggravate the present Japanese settlement movement which is assuming formidable proportions there. A large immigration of Japanese farm labor would no doubt raise an awkward social problem as Japanese workers are in their own land content with 25 cents a day wage and can in British Columbia live on 60 cents and save on an 80 or 85 cents wage. The consul estimates that there are rather under 1,000 Japanese in British Columbia, most of whom are male workers. Local labor organizations place the number at between 2,000 and 3,000 who are keenly competing at fishing, b at building, logging, lumber working and labor on river and coasting steamers.

## Anxious To Emigrate.

The commissioner of Dominion lands has recently received enquiries from four young women in Norway, who are desirous of coming to Manitoba, but whose means do not permit of their doing so without assistance. They will be willing to accept employment as domestic servants with people who would undertake to defray the cost of their passage. From the correspondence it may be inferred that they are energetic, and will probably prove very satisfactory to parties who might avail themselves of the opportunity of securing servants. It is understood that a great many come out to Montreal under these conditions, and that the arrangements were very successfully. Enquiries may be addressed to the commissioner of Dominion lands, Winnipeg.

## No Place For Miners.

The steamer Queen, which recently arrived at Victoria, B.C., on her last Alaska trip of the season, had as passengers a number of disappointed Cook's Inlet miners, one of whom summarizes the situation thus: "I never saw a better country to keep away from. Everything seems to go wrong and there are men here who are actually suffering from want. I don't know what the poor fellows are going to do, for they have no money and without money they cannot get out of the country. It was reported at Sitka that the United States revenue cutter Pinta was going to the Inlet to take away those who desire to leave. I think the government should do something for there is no way by which the poor fellows can escape without assistance."

The Hawksbury Milling company's oat meal mill and kiln was burned the other morning. The loss is only partially covered by insurance.

## A Gigantic Monopoly.

The Boston Commercial Bulletin says: "We understand upon the best authority that the Western Union Telegraph company controls at the present moment the importance of such control will at once appear to everyone who appreciates how the two have come in competition during recent years. The Western Union dividends had become threatened through the competition of the Bell Company, but it has long been a fully arranged plan for the Western Union to assume control of the telephone company. The two together can probably make it very warm for the Postal Telegraph company, or the final outcome may be a combination of all three. J. Pierpont Morgan has been the largest purchaser of Bell Telephone stock at auction recently, but the manner of purchase has been cleverly concealed. Western Union stock has ruled weak on the New York stock exchange during the past few days, but this weakness is thought to be part of the program of those conducting this gigantic deal. The combination of these two concerns will mean an almost impregnable monopoly of both the telegraph and telephone business in the same hands."

## NORTHERN PACIFIC RAILROAD.

TIME TABLE—Taking effect on Sunday May 3, 1896.

## Local and General

—The Grenfell agricultural show will be held on Sept. 23.

—Robt. Baird returned from Touchwood last Thursday.

—K. Johnston has 500 head of cattle to winter. See ad.

—J. Rogers, the genial land inspector, was in town this week.

—A flock of wild geese were seen flying south on Monday.

—Miss Flo. Grieve, accompanied by her brother Alex. and J. Cathcart, left last night for Portage la Prairie.

—The Anglican Synod opened yesterday in Winnipeg. Delegates from all parts of the Dominion are in attendance.

—Mrs. Dobie and Miss Kirkland of Indian Head, visited friends in town this week.

—BEAVER Plug is the highest grade and richest flavored Chewing Tobacco made. Try it.

—Miss May Spearman of Indian Head, spent a few days in town visiting friends last week.

—At Indian Head, on Monday, Aug. 31, the wife of Geo. Gibson, Qu'Appelle, of a daughter.

—Arthur Leveridge has opened a drying and clothes cleaning establishment on Qu'Appelle street.

—E. A. MacCaul who has been laid up through illness for a few days, is again able to be around.

—Miss Beatie Dickie, of Puslinch Lake, Ont., is visiting Miss McWilliams at Lake's End Mission.

—Mr. Harrison of Hedgesford is officiating in the pro-cathedral during the absence of Rev. J. P. Sargent.

—Clifford Bros., photographers, have a number of fine views of Qu'Appelle and Fort Qu'Appelle on exhibition.

—"Don't be deceived." Insist on getting the genuine TONKA Smoking Mixture; 10 cents a package or 1/2 pound tin.

—M. O'Hara, of Moose Jaw, has gone on a trip to Boston via Minneapolis and St. Paul. Rumor says he will not return alone.

—A fine sample of wheat, grown at the College farm, was shown us yesterday by Mr. J. H. Boyce. We judge it will grade No. 1 hard.

—The sacrament of the Lord's Supper will be dispensed in the Presbyterian church on Sunday at the close of the morning service.

—Mrs. E. W. Warner, accompanied by her two little boys, returned on Sunday from a visit to friends and relatives in Ontario and New York.

—S.A. McGaw, S.P. Clark and T. Brady, of Winnipeg, arrived in town yesterday morning to open the wheat market. They drove to Indian Head the same day.

—Claude Pinder, for some time employed in The Progress, left on Tuesday morning for Revelstoke, B.C., to take a position in the establishment of his brother-in-law.

—Mr. Broad, who has been operating the creamery here, left on Thursday last to take a similar position in a Manitoba creamery. Mr. Podham has taken his place.

—The ceremony of laying the corner stone of the new Presbyterian church at Whitewood took place Saturday last. The building is to be a brick veneer with a seating capacity of 200.

—Mr. John Grieve has a sunflower plant with fifty-four flowers upon the one stalk. He also has one sunflower measuring 3 feet 1 inch in circumference. The stalks are over six feet high.

—T. J. Scott has just returned from a concert trip east as far as Broadway and had great success. Mr. Scott since coming here has also booked concerts for Fort Qu'Appelle on the 14th, Indian Head on the 18th, Qu'Appelle Station on the 21st, and Grenfell on the 25th. Mr. Scott will be assisted by Mrs.

Scott at concerts in the neighborhood, and lovers of good music will have a rich treat in store for them.

—Rev. T. A. Teitelbaum of Saltcoats, delivered a lecture in the pro-cathedral last evening on the "Holy Eucharist," to an attentive audience. He left for Winnipeg the same evening to attend synod.

—Prof. McLaren, of Knox College, and Rev. R. P. McKay, Foreign Mission secretary, have been visiting the Indian missions in British Columbia, and are now working their way homeward, taking in the missions in the Territories.

—J. A. Unsworth, our popular young druggist, left for the east last week to enjoy a well-earned holiday and take in the Toronto exhibition. During his absence Dr. Henderson will attend to the prescription department.

—The work on the new elevator is being rapidly pushed forward, and in a week will be about completed. A well has been sunk close to the building and a plentiful supply of water found at fourteen feet.

—Accounts from all over this district go to show that the wheat crop this year has not been affected by frost. Harvest is in full swing. The sample of grain will be the best harvested here in years and the farmers are jubilant. We may look forward to better times.

—A free concert was given last night in the town hall, by Wright & Beal, assisted by Mrs. Wright. The program consists of selections from different operas, humorous and sentimental songs, comedy sketches, etc. The performance will be repeated this evening. Everyone invited.

—Rev. Mr. Kemlo has been confined to his bed for the past ten days, having an attack of typhoid fever. Under the careful attention of Dr. Elliot he is doing as well as could be expected, though it may be a few weeks before he will be able to take charge of his work again.—Grenfell Sun.

—Last week W. G. Moore, of the McLeish farm, had the misfortune to break his collar bone. It seems he was riding one of his horses when the animal stumbled, throwing him to the ground and rolling upon him. Under medical treatment he is now doing well, but will be unable to render much assistance in the harvest field.

—Mrs. T. J. Scott has not only a good voice but can use her hand remarkably well, as will be seen from the first-class work turned out by this lady now on exhibition in Unsworth & Co.'s drug store. The work referred to is free hand crayon drawing, and any parties who would like to have any photo enlarged can get particulars at the drug store.

—The Buchanan Dramatic company played here to rather slim houses on Friday and Saturday evenings last. The company is a good one and pleased their audience on both occasions. At the end of each performance a concert was given for an extra consideration—10 cents—in which a number of songs, violin solos, etc., were given. They play all this week in Regina.

—The Very Rev. John Grisdale, D.D., D.C.L., was consecrated as Bishop of Qu'Appelle on Sunday last, in Holy Trinity church, Winnipeg, in the presence of a large and representative congregation. The ceremony was most impressive and will be long remembered by those who witnessed the ceremony. It is expected the new bishop will take charge of his diocese about the middle of this month.

—The Ladies Aid of the Presbyterian church have engaged the services of Mr. and Mrs. T. J. Scott, the far famed vocalists, to give a grand concert in the town hall on Monday evening, Sept. 21. It is needless to say that Mr. and Mrs. Scott will get a bumper house from

**40 YEARS THE STANDARD.**

their many friends in and around Qu'Appelle. Tickets may be obtained from members of the Ladies' Aid.

—Norman McLeod, a C. P. P. brakeman, was found bleeding and unconscious on the track near Grand Coulee, by Sergt. Howe, N.W.M.P., who was out duck shooting. McLeod had evidently fallen from a train. He was conveyed to Moose Jaw and attended by Dr. Turnbull. Consciousness has not returned and no hopes are entertained of his recovery.

—Besides the latest time tables, game laws, postal and other information usually found in Stovel's Pocket Directory, September issue contains a complete list of statute labor and fire districts for the N.W.T., with the names of overseers and their addresses, also time tables for the new route to the Orient instituted by the Great Northern railway, and railway and telegraph rates to the gold district in the Kootenay.

### Chickney Chirpings.

A week ago last Sunday Mr. and Mrs. A. D. Garratt, accompanied by their two young children, met with what might have been a more serious accident. As they were driving home early in the evening, their horse shied, upsetting the buckboard and throwing all its occupants to the ground. The horse, as soon as the buckboard righted itself, went off, but was soon stopped by the lines catching around the hub of the wheel. Mr. Garratt and the children escaped with a good shaking, but Mrs. Garratt sustained a slight injury to her shoulder and back. She has, however, nearly recovered again.

The wolf your Lorie correspondent spoke of in last week's issue of The Progress, has probably found his way to Chickney, as H. H. Munnerman lost about twenty chickens in a single night.

The farmers in this vicinity have about finished cutting. Some have already finished and have started stacking. The grain is of a good sample, there being very little frozen in it.

A. D. Garratt's yearling colt was found dead. Mr. Weller, V.S., on opening it, found that the blood had all rushed to the head. Apoplexy was probably the cause.

W. E. Pierce had the misfortune to lose a horse lately. It fell down a steep place and broke its neck.

Mr. Dill M.L.A., passed through this district on Monday last.

### Lorlie Lisplings.

His reverence from Kenlis opened services at the new Foster school-house a week ago Sunday. The building, with a seating capacity of about 100, was full to the door. Among the crowd we noticed Queen Aggy and her daughter, also little Red Riding Hood. The foreman of the Park Farm came down from his ranch south of File Hills to sing tenor and lead the choir. He is a fine singer, and those who were deprived of the pleasure of being present missed a rare treat.

Mrs. Stuck, of Abernethy, arrived here to-day (Monday) with the sad news of the death of Mr. A. J. McKenzie, who departed this life Sunday night, Aug. 30. The news has cast a gloom over this district.

We were pleased to have a call recently from Mr. Geddes of Kenlis, accompanied by Mr. D. J. Sturd, of Owen Sound, Ont.

By the time this goes to press all No. 1 hard will be in stack. The damage done by frost in this district will be very light.

Mr. Franks, merchant of Pheasant Forks, dropped in last week. He looks hale and hearty.

Miss Franks, and the belle of Pheasant Forks, were guests at Mr. Barnsley's recently.

Miss Maggy Aldous is not going to Vancouver as was reported some time ago.

### THE BUTCHER BOY.

### Commercial Travellers.

Wm. Golding, commercial traveller, 130 Esther St., Toronto, says. For 15 years I suffered untold misery from Itching Piles, sometimes called pin worms. Many and many weeks have I had to lay off the road from this trouble. I tried eight other pile ointments and so called remedies with no permanent relief to the intense itching and stinging, which irritated by scratching would bleed and ulcerate. One box of Chase's Ointment cured me completely.

**\$11 TO ORDER.**

**AGENT: R. E. SMITH**  
Qu'Appelle Station

**1000 Samples to select from.**

**THE FIRST SHIPMENT.**  
Mr. D. D. Mann returned last evening from Gladstone. He states that fourteen miles of the Lake Dauphin railroad have been completed and the track layers are pushing the work with great rapidity. The first shipment of wheat over the new line was made yesterday. The cars were taken to the end of the track and there loaded with grain which was billed through to Port Arthur.

**Cariboo's Rich Placers.**  
VANCOUVER, B.C., Aug. 31.—Word is just received from Cariboo that the last clean up of sluices and cuts in the Cariboo Hydraulic mine amounts to \$31,000 after 25 days run. This is the biggest prize of bullion ever captured from any mine in the same space of time. The big brick will be placed on exhibition at Montreal.

**THE HOTELS.**

McMillan; Winnipeg: Chas. Pingle; Major Grover; J. A. Stewart; Geo. Rogers; J. H. Ellis; J. Zimmerman; Regina: G. F. Miller; Fort William: H. Brett; J. Jones; H. Gordon; J. Murphy; Indian Head: G. Rogers; Pense: J. McLehman; Fort Qu'Appelle: Dr. Bird; Whitehead: J. Cook; Stonyford: Ont.

**His Face was a mass of blotches.**  
But now his skin is clear as a year old baby's.

**Scott's Sarsaparilla his Salvation.**  
Nothing blights existence like the knowledge that our appearance is repellant to those with whom we come in contact, nor is there any relief like that of feeling that the disgusting causes have been removed. Says Mr. William Alger: My face on one side was a mass of blotches, some of which were constantly full of matter. I run a bake shop doing my own work, but my face got so bad that customers drifted away. Then I hired a man and went to a doctor. He said my blood was in a horrible condition. I sold my business and moved to the city where Scott's Sarsaparilla was recommended to me. The first bottle did me much good, and after taking five bottles my skin is as clear as possible, and not a sign of my previous disfigurement. I say Scott's Sarsaparilla is the best blood medicine going and am speaking from experience. Pimples, blotches, boils, ulcers and all diseases arising from vital exhaustion and impure blood are radically cured by Scott's Sarsaparilla, a concentrated compound of the finest medicines ever known. Your druggist has it at \$1. But get Scott's. The kind that cures.

**OH, SAY!**  
Did you see those pretty **Baby Carriages** Where there is such a fine display of FURNITURE, PICTURE FRAMES, &c., &c.?
